A. E. MICHAEL'S,
A GOOD PLACE TO TRADE.

Herman Ducholke Killed

Mr Fred Ducholke received a message Monday that his son Herman, who was foreman in a coal mine at Midlandville, had been gassed. Midlandville is in the Drumheller district.

The mine had been out of commission for some time, as a result of the miners' strike, and it was the intention to open it up again for the season, and three men, including the deceased, went into the shaft on a survey. On their not returning within a reasonable time, a rescue party with gas masks entered the mine and found all members of the first party had been asphyxiated.

Herman had a host of friends here, being quiet and likeable. He spent a short time last June with his parents in Stony.

Mr and Mrs E. Ducholke and Mr Louis Fink left on Monday for Drumheller, to attend the funeral.

Inga Councillors.

All the councillors were present at the meeting of Inga municipal district in Stony on Friday last, with Reeves How at presiding. The principal business attended to was the matter of a complaint received from some ratepayers in division 2 that road work was not being done to the satisfaction of the said ratepayers. A deputation of the latter was present and aired their grievances. The councillor for that division made a statement in reply.

Messrs English and Lee of the Dept. of Municipal Affairs were present, on invitation, and took a keen interest in the discussion.

On motion of Councillor McKinlay, the matter was laid over for further consideration.

Commencing Volume Five

With this issue The Sun begins the fifth year of its publication in Stony Plain.

The Editor wishes to thank all those who have made its stay in Stony possible, and hopes for a continuance of their support.

We have gained many friends in the past four years, and though of necessity a small-sized newspaper, we have reason to believe that The Sun is a welcome visitor in the majority of the homes in the Stony Plain district.

This leads us to remind you that subscriptions to newspapers are like taxes—they refuse to stay paid up. Thank you! How's yours?

Supplementary Exams.

The Minister of Education announces that supplementary exams for grades 11 and 12 will be held in 10 different centres, including Edmonton, beginning Sept. 2.

The two Normal schools, Camrose and Calgary, will open this year Sept. 23 and run thru to June 7, 1925, giving 35 weeks of school work. The rule this year is that no conditioned students will be admitted to either of The Normal schools.

Calendar.

Aug. 8—Dentist at Stony Plain.
8—Ball game, Regulars versus Scrubs.
Aug. 12-13—Stony Plain Fair.
13—Duffield ball team at Stony.
16—Mr Washburn's meeting in Ducholke's Hall.
19—Women's Institute meets.
20—Washburn's ball team at Stony.
22—Dance at Holburn Hall.
24—T. B. S. A. meeting in Town Hall.

Shoppers are reminded the Wednesday half-holiday is now in operation in Stony Plain and continues through the month of August.

LOCAL NEWS.

Mrs Maud McKinlay has her mother Mrs E. Emerson from Seely's Bay, Ont., and Miss Sara Stanton, of the same place, visiting with her this week.

Miss E. Emerson, who had been visiting with her sister Mrs M. McKinlay at Edmonton Beach for two weeks, has returned to her home at Lloydminster.

Mr Henry Miller and Banker Edwards are taking vacations this week.

Mrs Wm McColla, Pears, was visiting this week with Mrs W. J. McColla.

Philip Theis left Tuesday for his home in Los Angeles.

Pete Gowanwka, is visiting this week with Mr Gambel at Glory Hills.

The inspector of weights and measures, Mr C. Brownlee, was operating in Stony on Friday.

R. L. Ghiselin reports the sale, for Mr Joseph Kuhnly, of SW 23-52-1w5, to John Namanazov.

Owing to the inclement weather on Saturday last, Mr W. M. Washburn, the gentleman who was going to explain to us Alberta's Financial Condition decided to postpone the explanation for another two weeks, Aug. 16.

The damage to the Charlie Ries house on First street by lighting a fortnight ago has been settled for by the local agent of the Connecticut Fire Insurance Co., Mr Paul Werner.

Mr Moyer has just finished a very excellent job of painting on Wong York's hash emporium, Main street.

Our new real estate man, Mr J. A. Barrie, reports business as being rather quiet at present, with a few applications for hagel versicherung.

The International Bible Students are arranging to hold a series of six lectures in Stony Plain, commencing Sunday Aug. 24, at 7.30 p.m. Meetings will be held the same day at Mauly School-house at 3.

That local hog-raisers are getting practically all that there is to be got for their product is easily proven by a visit to the Stockyards any Thursday. High prices have prevailed here for some time past, but this was topped on last buying day when some farmers got the Edmonton price straight; while others claim they got the City price and a bonus, but this latter could not be verified.

After a two years' absence, Shiang Sue was in town this week. Have you met

ORANGE PEKOE TEA "is good tea"

The ORANGE PEKOE QUALITY makes
finer tea and more of it

Do Something For Canada

Addressing a gathering at Vancouver last month, His Excellency Baron Byck of Vimy, Governor-General, said:

"I have another year and a half to stay in Canada, and when I go somehow I would like to feel that Canada has trod the path of prosperity and toward idealism. I would like to feel that when I go, the people will say: 'There goes a good Canadian.' I can't tell of the pride I would give me to think I had done something for this country, for which my pride is unquenchable."

These words came at the conclusion of an address filled with optimism for the future of Canada, but urging as an essential, national unity and the putting of idealism into the minds of the rising generation. "I know that Canada is going ahead," declared His Excellency, "and that the spirit that emanated from small pieces where the Canadian units formed and spread to battalions at divisions over the world still exists among the Canadian people. But we must see eye to eye, for without unity Canada cannot become a real nation."

It Baron Byck, an Englishman, whose duties necessitate his residence in Canada for only five years, feels this way about the Dominion, and is imbued with this desire to do something for Canada, how much more intensely should native-born Canadians, and those who have chosen Canada by adoption as their permanent homeland, feel towards this Dominion, and how anxious they should be to "do something for Canada."

And, after all, that is just what Canada needs, that her sons and daughters should strive to do something for her. For a time a tendency towards paternalism swept over this country when the doctrine seemed to find ready acceptance that it was the business of the Government or State to look after the people rather than that the people should look after and promote the welfare of the State and thereby promote the well-being and advancement of all.

No doubt the war was largely responsible for this tendency, because, while that grim conflict was being waged, it became necessary for the State to call upon the entire citizenship to fight for its and their preservation, and while in the army every man's slightest want was provided for by Government and his dependent cared for by Government in his absence. War made these things necessary, but a continuance of war policies would mean national bankruptcy, and State paternalism carried to an extreme inevitably means national disintegration.

Fortunately, popular belief in the efficacy of State aid for this, that and the other thing is on the wane. People have learned that the Government is, after all, themselves, and that it is impossible to lift oneself by the boot straps. The slogan of today is not "Wait and see what the Government Will do," but "Do something yourself, for yourself, and for the country."

It is selfish, though for oneself only. England would not be the great nation it is if Englishmen had only had a vision of England, and not of the Great British Empire in making. The United States would never have grown into the powerful nation it is today if the people had insisted on States' rights first, last and all the time regardless of the national well-being. As Baron Byck has emphasized, there must be unity in Canada, and union in national endeavor and enterprise, before a real nation can arise.

And national idealism requires to be inculcated in the youth of today and carefully nurtured and developed. Men and women are laid at work earnestly striving for some object in life, but what greater objective can any Canadian have than the rendering of service to Canada itself. Development of our natural resources may bring rewards to the individual, but it is bound to bring something greater to Canada itself if carried out in a spirit of national service rather than of national exploitation.

When the time comes for a Canadian to go, not going in the sense of Baron Byck's departure for his old home in England, but going because life's work is ended, what greater satisfaction can be felt than in a knowledge that he has done something, achieved something for his own country. While not agreeing with the extreme to which the theory was carried by Germany, it must be admitted that there is much to be said for the doctrine, or policy, call it what you will, which sets forth that the individual exists for the State and not the State for the individual. The truth, of course, lies between these two extremes. In Canada there is apparently little danger of the German policy of a State superimposed on the individual finding acceptance; the danger to be avoided is that of regarding the individual as all-important and the State as of little account except as it can be used to promote the selfish aims and desires of the individual.

Like the Boy Scouts with their slogan, "Do a Good Turn Every Day," Canadians should in unity and with a true national idealism strive in season and out of season to do something for Canada.

Syrian Citrus Fruits

The Syrians are fond of all kinds of citrus fruits, and their climate is particularly suitable for the cultivation of oranges and lemons, yet very little actual cultivation is done. The fruits found in the Damascus section are grown almost entirely for the purpose of adorning the open courtyards, which are built around a fountain in the middle of all Arabic houses.

Something New in Sidewalks

Pink sidewalk have been laid in a suburb near Herts, England, to go with the sidewalk from ordinary stone walks. The new walks not only are more useful to the eyes, but cooler beneath the foot, it is claimed.

German Aviator Breaks Gliding Record

Among European aviators gliding still continues to be a favorite sport. Performances such as established the world three years ago are now commonplace. A German recently surpassed all previous feats in gliding by remaining in the air for eight hours and forty-two minutes. He landed, moreover, at a spot higher than his starting point.

Norwegians Greatest Whale Fishery

Sixty per cent. of the world's whale fishing is done by Norwegians, and the Christians' correspondent of the London Morning Post estimates the yield this season at 70,000,000 cwt. Nearly the entire output was sold to the United States.

The genuine bears signature of

Wm. A. Fletcher

The Power Of Lightning

Pint of Gasoline Contains Same Energy As Average Lightning Bolt Said Scientist

Scientists have a way of talking about things that gives the impression of calm indifference to all that seizes and concerns the ordinary man. A great big streak of lightning that hurtles through space, opens the sky up for a strip that looks like a yard and half wide, and seems to be satisfied only by taking the steeples off a church or knocking the chimney from the back kitchen—the scientist looks on quietly taking a pencil and starts to figure on the back of an envelope.

He announces that it is forceful and impressive because of its high voltage. In a few more minutes he has it figured out, that it was not worth 75 cents as far as electrical energy is concerned.

The late Dr. Stettin, before his death, claimed that the average bolt of lightning was no greater in power than the energy stored up in a pint of gasoline. At the rate paid for electric lights in cities with which he was familiar the average streak of lightning was not worth \$1; on the basis of prices paid for power, not over 20 cents.

The same authority had it figured out that a person with a very small gas engine could make as much electricity for 80 cents worth of gas as was developed in an average thunderstorm.

It's very interesting to have it all worked out on that basis; it might even make a timid person resolve not to be afraid of any 60-cent electrical storm; yet there would be the mental reservation that it would be better to sleep in a room with a gas engine or to make one's own supply of electricity rather than have it shot at him from the heaven—St. Thomas Times-Journal.

PEOPLE "ALL NERVES"

What to Do If You Find Yourself In This Condition

The sort of thing that specialists speak of as nervous debility is the run-down condition caused by over work, household cares or worries. The sufferers find themselves tired, more or less irritable and unable to keep their minds on anything. Any and all sense of fun and the heart's delighting in life are gone. They are full of groundless fears, and do not sleep well at night. The hands tremble and the legs are shaky. They cannot give way, following a walk or any exertion. The whole condition, of course, may be described as pitiable.

Doctors of the nerves with poisonous remedies is a terrible mistake. The only real nerve tonic is a good supply of new blood. Therefore the best treatment for nervousness and run-down health is Dr. Williams' Pink Pills, which promptly build up and enrich the blood. The improved appetite, the strong nerves, improved spirits and new strength which comes after a course of these pills will delight every sufferer.

You can get these pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

King Entertains Lawyers

Visitors From Canada and U.S. Took Tea With Royalty

Visiting lawyers from Canada and the United States were talked and took tea with King George, Queen Mary, and the Prince of Wales in the palace grounds, so to speak, when the pleasant grounds to the rear of Buckingham Palace were thrown open to 3,000 invited guests, most of whom were visiting lawyers. Behind the severe forbidding front of the big building which faces the Mall they found little of the ceremony usually associated with royalty.

It Testifies for Itself—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Whoever tries it for colds or coughs, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

Irish Linens Are Strongest

Linens valued at \$171,743, and manufactured in the Irish Free State, were bought for the United States liner Lehigh. The contractors found that the type of linens tough enough to withstand the steam laundries of New York and Southampton were not available in America.

"Scratching post," of wood are now provided in all the animal cages at the London Zoo.

A Trans-Canada Highway

Canadian Highway From Sea to Sea A Thing of the Future

It is now possible to cross Canada by motor car, with the exception of two detours into United States territory. From sea to sea is a thing of the future, but perhaps not of the so far distant future as many suppose. The traveler by road is incidentally a generous distributor of money, and if a few thousand automobilists from the United States could be induced to run across Canada every year their spendings would make up for the capital costs of well made and well kept roads. Besides which, of course, the country would secure the development of some presently inaccessible districts which would thus be opened up to settlement and use—Edmonton Bulletin.

Asthma Can be Cured. Its suffering is as needless as it is terrible to endure. After its many years of relief of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort of body and peace of mind result with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

Vancouver Expects Big Grain Movement

One Hundred Million Bushels Is Aim For 1928

One hundred million bushels of grain through Vancouver for the 1928 season is the prediction of grain men here. With the 1923-24 crop still moving, shipping and grain interests are already negotiating for space for next season, when the elevator capacity here will be at least 7,700,000 bushels, as compared with 2,000,000 now. By the end of the season 60,000,000 bushels will have been moved. It is estimated, based on the total movement of 53,000,000 bushels to July 23.

Paring a corn is both tricky and ineffective. It is much better to use Kellogg's Corn Remover and eradicate them entirely. Latitude 36° has been first determined by Hipparchus of Nice, about 162 B.C. He also determined longitudes.

In the Middle Ages cats were always kept in convents.

For Sore Feet—Minard's Liniment

Test Trip Is Success

De Luxe Plane Carries Eight Passengers From Detroit to Chicago

An airplane carrying eight persons and equipped with reclining chairs for six passengers, with a table arranged between the chairs, arrived at Chicago from Detroit on a test voyage after a cruise of three hours and five minutes.

The plane, owned by M. B. Stout, left Detroit at 1:13 a.m. and landed at Maywood at 10:18 o'clock. It returned to Detroit later in the day. The six passengers aboard included two women, while the crew consisted of a pilot and mechanic. The women were Mrs. Stout and Miss Jane Summings, of Canada.

The plane is all metal, with 2,380 pounds useful capacity for oil, gas and other equipment, and measures eight feet from tip to tip. It has windows on all sides. Doors that can be sealed are between the pilot's seat and the passenger compartment, which is so arranged as to be almost soundproof.

The airplane party ate breakfast in Detroit, had lunch in Chicago and returned in time for dinner in Detroit.

Latest Inventions

A Rumanian inventor is to exhibit in Paris a method of showing motion pictures in three dimensions without the use by the spectator of colored glasses. Next should come a device to prevent the scenario from falling flat—Springfield, Mass., Republican.

BRITISH PROTEST OVER RANGE OF BATTLESHIP GUNS

Washington.—Disclosure in London that the British Government has made formal representations to the United States and Japan, contending that, in its opinion, any increase in the elevation of the guns of existing battleships under the flag of any nation signatory to the Washington naval limitation treaty would be a breach of that treaty, gave an entirely new aspect to the discussion of the subject, which has been in progress in the United States for two years or more.

The announcement was met with complete silence on the part of officials of the state department, but at the navy department, Secretary Willbur, speaking on the basis of press reports and not upon any official representations he may have seen, declared that "it is a good idea to have the question raised in order to have it settled." The announcement in London, it is believed in this connection, has served to give the question a diplomatic status it has not before known.

So far as known the Washington Government has taken no steps toward replying to the British representations. It is believed that the communication referred to in the House of Commons by the secretary for foreign affairs was transmitted several weeks ago. In view of this it is evident that the Washington Government sees no reason for urgency in dealing with the situation.

The announced purpose of the navy department is to re-submit to Congress at the next session its full programme for modernization of the older battleships of the United States navy. That programme included elevation of turret guns to give them modern battle range.

The comparative status of the British and United States battle fleets in the matter of ranges comes down to a question of individual ships, it is said, as in both navies there is a wide range of difference between vessels. One group of four or five of the newest United States craft probably outrange substantially all of the British vessels, but on the other hand, because of post-war alterations made in a larger group of British ships, outrange the balance of the United States battle divisions. The average range is said to be well in favor of the British.

Canadian Family Stranded On Border

Are Victims of United States Immigration Quota Law

Niagara Falls.—A pitiable case of St. Catharines woman who is stranded in this city, a victim of the United States immigration laws, has been reported to the United States consul here. The woman was told that her three children would enter, but that she would have to come under the British quota. She was born in England, but was brought to St. Catharines when she was a month old. She married a Canadian, and her three children were born here. Her husband agreed to Buffalo some time ago, and is in Buffalo now.

The home in St. Catharines was sold, and the woman appeared with all her belongings, only to be told that she must not enter, and must comply with the regulation governing the British quota. She was told her chances of entering the States, for months at least, were small.

Conciliation Board For Miners

Will Investigate Wage Dispute Between Edmonton Operators and Employees

Ottawa.—James Smith, of Edmonton, has been appointed chairman of a board of conciliation which will investigate the wage dispute between Edmonton coal operators and their employees. In the absence of any recommendations, the Minister of Labor, Hon. J. G. Thompson, has appointed Mr. Smith to preside over the board, of which the employers will be represented by E. G. Brennan and the employees by P. J. Rowe. The object of the inquiry is understood to be the negotiation of a new wage agreement.

W. N. U. 1936

Inter-Provincial Agency For Prairie Wheat Pools

Regina, Sask.—Establishment of an inter-provincial selling agency to be known as the Canadian Co-operative Wheat Producers, Ltd., with headquarters in Winnipeg, was decided upon at the conference here between executive members of the Manitoba and Saskatchewan and Alberta wheat pools. Immediate steps are being taken to secure a Dominion charter for incorporation from Ottawa, and a committee was appointed to proceed with the organization of the new company in Winnipeg. Official announcement that the three prairie pools had undertaken to incorporate the Canadian Co-operative Wheat Producers, Limited, was made at the close of the conference.

Police Unable To Rescue Major Imbrie

Every Effort Made When Mob Attacked At Tehran; Say Dispatches

London.—According to the Morning Post, the Persian legation here is in receipt of an official statement from Tehran, declaring that, contrary to other advice, the Persian police made a great effort to rescue Major Imbrie, the United States Vice-Consul, who was killed by a mob in the Persian capital. One policeman was killed in this endeavor and several injured, it was stated. Far from neglecting their duty, by failing to prevent a mob from breaking into the hospital where Major Imbrie had been removed, it is declared that the police actually arrested practically everybody implicated in the hospital attack.

The Government stated that some days prior to the disturbance, much sectarian feeling was manifested among the participants in the religious demonstrations going on in Tehran. The police and soldiers, therefore, had been cautioned to avoid any action tending to aggravate the over-crowded state of the crowds, the Government not for a second anticipating that grounds would arise for an attack on foreign residents. It was in view of this, the statement adds, that the police withheld firing upon the mob when Major Imbrie was attacked.

Australia To Ask Reciprocal Trade

Will Shortly Open Negotiations For Treaty With Canada

Sydney, Australia.—Negotiations will shortly proceed with a view to Australia obtaining reciprocal trade with Canada, New Zealand and South Africa, Austin Chapman, Federal Minister of Trade and Commerce, announced.

Mr. Chapman referred to a section of the customs regulations dealing with British goods and declared that the anti-dumping act was essential to Australia's protective policy.

Ottawa.—Negotiations for a reciprocal trade treaty between Australia and Canada have been on the books for a couple of years. Hon. J. A. Robb, at the time Minister of Trade and Commerce, paid a visit to Australia to negotiate. There were further discussions during the Imperial Conference last year, and subsequently Senator Wilson, of Australia, visited Ottawa to confer with the Dominion Government. A Canadian official position was an exchange of preferences, but Australia could not see her way to full acceptance.

Canada Represented On Council Board

Ottawa.—Canada was represented by Mr. Justice Day of the Supreme Court on the Imperial Privy Council Board which examined into the constitutional question whether the British Government could constitute the Irish Boundary Commission, as long as the Government of Northern Ireland declined to appoint a representative on the commission. The board was chosen by the Lord Chancellor and was representative of the Dominions and India as well as of Great Britain.

Brazil Rebels On the Move

Buenos Aires.—Reports reaching here from Southern Brazil state that the Brazilian rebels, ousted from São Paulo, and fleeing northwest, intend to cut their way through the front of the federal forces, and then swing south.

Olympic Marathon Winner

ALBEN STENROOS

Finland, the wonderful Finnish wood worker, who won the Olympic marathon at Paris in 2 hours 42 minutes 23.3 seconds.

State Cavalry Clashes With Mob At Kashmir

Seven Rioters Were Killed In Northern India Demonstration

Calcutta.—Seven rioters were killed and 40 wounded in a conflict between a mob and a small force of state cavalry in the state of Kashmir, Northern India, according to press dispatches. News of trouble seldom comes from that part of the country. It is reported the authorities now have the situation in hand.

Printed leaflets without any signature, or anything to indicate their origin, are being circulated announcing that the Bengal revolutionary council has passed a resolution to begin a campaign of ruthless assassination of police officers. Undoubtedly the object of these leaflets is to cause a stampede of the native police force, who hitherto have remained staunch. The circulation of these threatening documents is a recurrence of some similar work in 1915.

B.C. Forest Fires

Dangerous Stage Again Reached On Account of Dry Weather

Victoria, B.C.—The forest fire situation in British Columbia has reached a dangerous stage again as a result of the present spell of hot, dry weather throughout the province, the weekly fire bulletin of the lands department says.

So far this year, there have been 1,275 fires, as compared with 662 at this time last year, and 1,533 in 1922. Vancouver district, with 309 outbreaks, has suffered most to date.

Obed Smith To Retire Post

Ottawa.—J. Obed Smith, Canadian Commissioner of Immigration in the British Isles, is slated for retirement. He has been in that position for the past 18 years, while his total service in the department covers a period of 35 years. Mr. Smith was actively associated with the direction of immigration during the boom days of the nineties and has a very fine record. He will probably retire under the new superannuation act.

"Bill the Barber" Is Captured

Saskatoon.—Viggo Mackenzack, better known as "Bill the Barber," who escaped from the Weyburn Mental Hospital on May 18, was captured at Renfro, Man. He was taken at the farm of his father-in-law, 10 miles from Renfro, by Corporal Noid of the Provincial detachment, Saskatchewan Provincial Police. Corp. Noid stated Bill had a loaded revolver in his possession when arrested.

To Seek Protection From Effects Of Death Ray

New York.—Experiments in a method of protection against the "death ray" recently discovered by H. Grinnell Matthews, the British expert now visiting this country, are already underway, and the inventor of the ray is playing a prominent part in the tests, through the impairment of one of his eyes from the secret properties of the ray. Dr. Henry H. Reiss has undertaken research work to determine the nature of the ray and its effect on bodily tissue in the hope that some material may be found which will shield off or obstruct the ray in the same manner that rubber, lead, and platinum give protection against the X-ray and radium rays.

Would Have Tribunal More Representative

All Political Parties Should Have Interest In Railway Says Thornton

Vancouver.—Speaking here at a luncheon tendered in his honor by the Canadian Club and the Board of Trade, Sir Henry Thornton, President of the Canadian National Railway, declared it was a comparatively easy matter to keep politics out of the purchasing and other departments of the railway, but it was most difficult to meet unfair claims for political prestige.

"The time should come," he continued, "when all political parties feel that they have a direct interest in the railway. The railway belongs to no political party, and one way to keep the railway from being used in politics is to give proper representation to all political parties, with men of outstanding business ability representing each political group."

Sir Henry told his hearers that serious consequences might result from the establishment of the railway freight rates under the Crow's Nest agreement should this mean a general reduction of freight rates throughout Canada.

"If the restoration of the Crow's Nest agreement means a new and lower scale of freight rates throughout Canada, then I can say that the position of the two great railway systems will be serious," he said.

Rains Benefit Crops

Improved Prospects Over Wide Area In Alberta and Saskatchewan

Calgary.—Crops on summerfall in practically every part of the province have benefited immensely by the recent rains. The Herald says:

Stubbled in crops and spring plowing will not be changed greatly except in the south, where many of them will produce a fair yield. A new aspect has been brought to the whole crop situation; however, by the welcome moisture, and estimates of the Alberta area are now placed at seventy to eighty million bushels, instead of forty to fifty million. In the south the rain arrived at a most opportune period, and yields will be doubled in many instances, through better fruiting of high standing grain.

The Moose Lake area, from Drumheller to Hanna and east of that point, was saved from almost total loss by immense improvement to summerfall crops. The rain was late where stubbled in or spring plowing crops were concerned.

On the main line east, however, the same conditions prevail, although yields will be better. In the north, rains of this week supplemented moisture that fell previously when the south was drying up, and many excellent yields will result.

Cheese Exhibit At Regina

Regina.—Dr. C. Marker, Dairy Commissioner for Alberta, commenting on the cheese exhibited at the Regina exhibition, stated that it was the largest exhibit in the western fair circuit this year, and the largest ever shown in Western Canada.

With the exception of the year 1923 when there was a small class of cheese exhibitors, this is the first occasion when the product has been shown at the Regina exhibition.

Squadron Leaves Jamaica

Kingston, Jamaica.—The British special squadron, comprising the Hood, the Resolute and the Adelaide, has sailed for Halifax.

DATE SET FOR EMPIRE PARLEY IS TOO EARLY

Ottawa.—There are difficulties in the way of holding the proposed round-table conference of the Empire so early as October, it is pointed out here. So far as Canada is concerned, special representatives may be sent, although, to go to London, Premier King would probably have to abandon a proposed speaking tour in the west.

In the case of the more distant Dominions, the difference would be greater. Apart from the question of distance, New Zealand seems to be on the eve of a general election, which would make it practically impossible for Premier Massey to leave on short notice.

In Australia, difficulties have arisen in the lower house between the Nationalists and the Country Party, who constitute the Coalition Government, of which Premier Bruce is the head. This might make it difficult for Premier Bruce to leave on short notice.

In South Africa, General Hertzog, but lately elected premier, might not desire to go to England within the next few weeks. If, however, October is agreed upon, as it is suggested here, difficulties in representation might be met in nominal form for the conference. Dominion representatives at the meeting of the assembly of the League of Nations next month, along with high commissioners in London. In regard to Canada, however, the distance is so short, comparatively, that it would not be a difficult matter to send members of the Government, if need be. Two members of the Government, Hon. J. A. Robb, Minister of Immigration, and Hon. T. A. Lowe, Minister of Trade and Commerce, are in England now.

B.C. Can Supply Alberta Harvesters

Majority of Workers Will Be Secured in Coast Provinces

Edmonton.—No harvesters are to be brought in from the Old Country to help gather the 1924 crop in Alberta. The supply of workers will be secured from home, the majority coming probably from British Columbia.

Walter Smitten, Labor Commissioner for the province, reports, on his return from the harvest employment conference in Winnipeg, that an estimate of 40,000 men required in the three provinces for harvesting operations has been agreed upon, and that Alberta's quota of 10,000 still holds subject to change about the middle of August, when it will be revised in accordance with crop reports in hand at that time.

Of these, about 4,000, it is stated, will be found within the province.

Prize Winners From Royal Ranch

Prince of Wales Cup Royal Ranch At Regina Exhibition

Regina.—The Prince of Wales Agreed as a prize winner at the Regina exhibition when his Shorthorn bull, King of the Fairies, emerged grand champion and senior champion of his class. Cimsland Goldsmith and Princeton Corporal, two of his Royal Highness' other animals, were reserves in both classes respectively. Cimsland Goldsmith was adjudged junior champion Shorthorn bull.

The Hampshire ram put in exhibition by the Prince of Wales also won for its royal owner the title of champion and reserve champion. The championship in Hampshire ewes was another success for the royal ranch at Pelskirk, Alberta.

Says Germany Requires Big Loan

New York.—Germany will be unable to meet her reparation obligations without outside assistance such as the proposed international financial conference called for by Sir James Salfer, Director of the Finance Department of the League of Nations, at Geneva, who has arrived from England. Sir James is here to speak on the economic recovery of Europe.

Argentine Aviator Continues Flight

Rome.—Major Zanni, the Argentine aviator, said his companion are continuing their attempt to attempt the flight. They are following the route of the British flyer, Stuart MacLaren.

Here and There

In response to the appeal of the University of Bishop's College, Lennoxville, Que., for \$200,000, to meet present needs, the Canadian Pacific Railway has reported the plea by subscribing \$15,000 to the fund.

Canada will soon be the mecca of many moving picture directors, according to Herbert Brenon, producer for Thomas Meighan, who recently arrived at Banff to film the big outdoor scenes for James Oliver Curwood's "The Alaskan."

The fish catch of the world approximates \$1,000,000,000 a year in its cost to the consumer, of which \$780,000,000 goes to those who harvest it, statistics furnished by the United States Fish Commission declare.

The value of the tourist traffic to Canada is proved by figures supplied by the Parks Department of the Dominion Government, which show that the enormous sum of \$10,000,000 was paid by tourists in this country in 1923. This represents the Dominion's third largest source of foreign cash income.

On her arrival at Quebec, June 14, the Canadian steamship "Empress of France" broke the record for the fastest time made between that port and Southampton, England, from which she sailed, having maintained an average speed of over 19 knots. This vessel also holds the record for the run between Quebec and Liverpool.

Arrangements for the Pageant of Empire, to be held at the British Empire Exhibition July 21-August 30, are now rapidly completing. Episodes showing the history of Canada and the other Dominions as well as of the Mother Country from the earliest times to the present day are being organized with the assistance of prominent residents of the Dominion now in London.

Hon. J. E. Poirer, Minister of Colonization, Mines and Fisheries for the Province of Quebec, on his return from a recent extensive trip to the Transjordan district of that province, stated that there were over 2,000 prospectors exploring the goldfields of Quebec and at least five million dollars would be expended in development work in the region during the course of the season.

According to figures prepared by the freight department of the Canadian Pacific Railway, the export grain movement via Vancouver reached a total of 48,718,000 bushels on May 31, 1924, compared with a total of 17,887,716 bushels as on May 31, 1923. In each instance the figures cover the crop year commencing September 1st. The increase, therefore, is 18,830,284 bushels or 105.1 per cent.

Enthusiastic celebrations took place at Vancouver and Victoria, B.C., when the special service Squadron of the Royal Canadian Mounted Police, headed by H.M.S. Hood, the largest warship in the world and flagship of the squadron, visited the place recently. The squadron is expected on the Atlantic seaboard in August, when efforts will be made by Canadians on that coast to outdo the Pacific cities in the warmth of the welcome they extend. The anticipations are that thousands of visitors will gather at Quebec and elsewhere to demonstrate their affection for the officers and men of the fleet.

"You may say that Canada is becoming more and more interesting to Englishmen and before long additional English capital will be used here in the development of industries. I am very optimistic and believe that we are now progressing towards an era of unprecedented prosperity. What we need more than all now is the immigration of good men who will become an asset to this country," declared Sir John Aird, President of the Canadian from Europe recently aboard the Canadian Pacific steamship "Empress of France."

Vision as Applied to Railroading

Left—Selecting work as test of color-blindness. Right—Reading type in vision test. Below—Williams lanterns for testing color-blindness.

Are you color-blind? Short-sighted? Slightly deaf? You may be, without knowing it. If you have never been tested.

These physical deficiencies, in some walks of life, are of little importance. But in railroading certain responsible positions require perfect vision, color-sense and hearing.

The examination of applicants to positions as engineers, firemen, conductors, trainmen, watchmen and others directly concerned with the safety of trains and the periodical re-examination of successful candidates in these vital matters is the business of the railroads. In the Canadian Pacific, which provides an outstanding example of safety, with which they are conducted, there is a special department charged with this duty. It is called the Vision, Service and Vision, Color-Sense and Hearing Department. There is a Chief Examiner for Eastern lines and one for Western lines, each with a separate office.

All applicants for the positions already referred to, which demand a high standard in vision, color-sense and hearing, are required to pass an applicant examination and, if successful, must pass a further examination at least every two years thereafter, and in some instances more frequently, according to the diminution of their vision or hearing. They are also re-examined after any accident in which they are either directly or indirectly involved and which may have been caused by defective sight, hearing or color-sense. In addition, following any serious injury or illness or severe inflammation of either the eyes or eyelids, they are again re-examined and, not content with this, the regulations of the Canadian Pacific require them to face the examiner whenever they are placed for promotion.

Caution and regard for the public safety could hardly go further than this!

The tests employed are exhaustive and are so arranged as to approximate as closely as possible to actual conditions likely to be met with in their work by those examined. Applicants for positions as engineers, firemen, conductors, brakemen and others similarly employed are required to pass the near and far vision tests without glasses. If, at one of the periodic re-examinations, employees in these positions are found to be in need of glasses, they will be allowed to wear them, provided they bring the vision up to the required standard. Applicants for other positions may wear glasses for near or far vision, depending on their

work. All glasses must be approved by the company and every employee using them is obliged to carry a second pair for emergencies.

The vision test, which is held indoors, involves the reading of Shellen test types, including letters of varying sizes, at a distance of twenty feet or less, and the reading of an American Railway Association standard reading card for testing near vision.

Applicants and employees examined for hearing must have normal hearing in each ear. They are obliged to respond correctly to a whistle in a normal voice at a distance of twenty feet. How important this is will readily be recognized by those who recollect the difficulties of making out conversation through the noise of a locomotive with steam up or through the clamor of wind or rain. A mistake in a few all-important syllables under these conditions may easily be made unless one has perfect hearing.

Most interesting of the examinations is that for color-sense. The men are asked to identify colors displayed by a Williams lantern and to pass a Hering or Thompson color-selection test. The latter test is held in broad daylight. A large number of shades of wool of varying colors, called confusion colors because they are specially selected with a view to confusing the color-blind, are passed before the examinee. The examiner tells him to pick out all the wools which have red, green or some other color in them or perhaps to match them for shades. The man obeys and in a moment reveals his weakness, if he has any.

In the Williams lantern test the applicant is taken into a dark room. At one end of this room, twenty feet away, is the apparatus, consisting of an electric lantern on the front of which is a revolving disc containing a number of segments of glass, each in a varying shade of red, green, yellow, purple or blue, as well as white, all colors employed by the railways in their signals. The examiner switches on the light and turns the disc, requiring the man to name the colors displayed as the segments pass before the lens. In turn, small red, green, yellow, purple, blue or white circles of light, in varying shades, singly or in combinations of two or three, become visible. "What are they?" asks the examiner. "White-blue and red-light green and dark green," says the applicant, and so on, naming the

colors as he sees them. These wool and lantern tests reveal to an astonishing extent the prevalence of color-blindness. Fully four per cent of the applicants are color-blind without knowing it and will not believe it when the examiner gently but firmly points out the fact. As it is, of course, vital that all men whose positions involve or might involve the reading of signals and all applicants for those positions should have an accurate color-sense, no color-blind person has the slightest chance of passing.

The number of men, applicants and employees examined on a system so enormous as the Canadian Pacific is very great. Approximately nine hundred appear before the examiners every month on the Eastern lines alone, and between 13,000 and 15,000 employees on the Eastern lines come up for re-examination every two years. The figures for Western lines are approximately the same.

It will readily be understood that the entire system would be disorganized if these men, many traveling long distances, had to report to the offices of the Chief Examiners for their tests. The Canadian Pacific, therefore, retains two special cars, one of the Western and one on the Eastern lines, which are specially fitted as travelling test rooms and are continually on the move. It takes these cars two years to make the round of the stations within their jurisdiction, examining applicants and the employees of the company.

So, year in and year out, the Canadian Pacific continues these exhaustive tests which have as their object the maintenance of safety and efficiency.

Stony Plain and District.
On Sunday, July 27th, in Stony Plain, by the Rev. Mr. Whalen, Miss Stella Ingle, daughter of Mr. L. S. Ingle, was united in marriage to Mr. Glen Robert Ashmead of Blueberry.

Farmers wishing help for harvest are asked to put their requests in early.

Mr. Miller reports the following sales of Ford cars: Ph. F. Baron, Stony Plain; Philip Scheidegger, Geo. Scheidegger of Duffield; this makes three Fords in this latter family.

A reception was given Sunday evening last at the home of Mr. Karl Goetz, to a number of charming young people of the district. Music and dancing were indulged in, and a delightful lunch was served at midnight.

The usual good crowd assembled in Holborn Hall on Friday night last and had a good time, in spite of the fact that Martin's orchestra was unable to get to the hall on account of the muddy roads. Local musical talent was impressed into service and pleased all hands.

Another confetti dance will be held at Holborn Hall on Aug. 22, with Martin's orchestra on the program.

The second instalment of the Rotary Club's juvenile guests at Edmonton Beach have returned to the City, after a very enjoyable outing under the direction of Mr. Richards.

Did you get your fall catalogue from the Buzzard Mail Order house? When you make out your next order, show it to your local dealer before sending it away.

The Garden Plain Threshers (composed of members of the U. F. A.) have declared their intention to thresh only for members of the Alberta Wheat Pool.

It has been announced by H. R. H. the Prince of Wales that he will again visit his ranch in Southern Alberta this fall.

Tires and tubes vulcanised and repaired at Stony Plain Garage. 4109

Grand Trunk Railway.
Going east, 2:40 p.m.—Sunday, Mon., Wed., Thurs., Friday, and Saturday.
5:43 a.m., every morning, stops on flag only.
Going west, 1:30 p.m.—Prince Rupert Express, every day except Sunday.
2:17 a.m., every day, Vancouver Express; stops on flag only.

Sporting Notes.

Eric's baseball Scrubs had another "go" at McCulla's Regulars Friday night last, with the same result as on the former occasion—the Scrubs won; in fact, it is said to have been a "whitewash." The score for 3 innings was 2 to 0; and Manager Heichen figures this would have meant 6 to 0 for the full 9 innings.

The "accident" cannot be explained away by saying the Regulars weren't trying—as they undoubtedly were.

Line-up of both teams:

McCulla's Regulars—McDonald, J. Sheppard, Moyer, McCulla, Leach, p.; S. Zucht, Chesser, J. Schlitt, Outway.

Eric Heichen Scrubs—J. Ulmer, Hy. Trait, p.; Ph. Ulmer, Johnny Ulmer, Robbins, Heichen, Schoep, J. Miller, J. Barth.

The teams met again on Sunday on the local grounds with practically the same line-up, and McCulla's, with their best battery on the job. Some very good play was seen; as both sides went out to win, but the Regulars were the more fortunate and won by 9 runs to 5. The President of the Sportsfields is quite pleased to think his team can win one game from the Scrubs.

There will be another contest between these teams on the local grounds, tomorrow, weather permitting.

Mr. McCulla had planned on taking his outfit to Alberta Beach for the ball tournament there on the 3d and 4th, but word was received the journey was postponed on account of the weather.

Manager Heichen is taking his baseballers up to Muir Lake next Sunday, to play Val Pailer's Pickleville champions.

The basket ball team from Stony Plain High defeated the girls from St. Matthew school last week, by 9 goals to 7.

John Barth has received a letter from the secretary of the Edmonton postoffice football club, inquiring if a game could be arranged with the local kickers for some Saturday afternoon. This team won first place in the Third Division in the City league. The game will take place Saturday Aug. 9, with a return game in the City.

Baseball Schedule.

Stony Plain at home—	Aug. 8 Evansburg
—	13 Duffield
—	20 Wabamun
Stony Plain away—	Aug. 3 Evansburg
—	17 Duffield

and Electrical Work.

AT THE OLD SCHADECK
STAND,
STONY PLAIN.

Stony Plain and District

Mr. and Mrs. D. A. Stuart and Master John paid a visit to old friends in Stony this week, having made a motor trip from Delta.

Miss Gertrude Huffman, Edmonton, is visiting this week with Miss Sinner.

The meeting of the local Women's Institute will be held Tues. Aug. 19, at the home of Mrs. Fred Willie.

Ten dollars was taken in at the silver tea given on Friday last by the Ladies' Aid.

At the local Court on Saturday last a resident of Cynvel district was fined \$20 and costs for assault.

Monday was Civic Holiday in the City and a number of Stony's former residents, including Mr. J. Knebel, came out on the Selma special.

Mr. H. Loeblich, the well-known ball player, is leaving shortly on a trip to the U. S.

Auctioneer Zucht held a very successful sale yesterday afternoon for a Blueberry farmer, good prices being secured for the stock and articles offered.

The Big Fair Next Week.

Everything gives promise that Stony's Annual Fair, to be held next week, will be a successful affair, the entries received so far going to show that exhibitors are taking a renewed interest in this popular exhibition.

The Directors held a meeting Tuesday night in the Town Hall, at which final arrangements were made for the big fair.

Entries close on Saturday next.

NOTICE TO CREDITORS.

IN THE DISTRICT COURT OF THE DISTRICT OF EDMONTON.

IN THE MATTER OF THE ESTATE OF FRANZ TREIT, DECEASED.

NOTICE is hereby given that all creditors of and all persons having claims against the estate of Franz Treit, late of the Town of Stony Plain, in the Province of Alberta, Gentlemen, deceased, who died on or about the 27th day of February, 1924, are hereby required to send by registered post pre-paid or deliver to F. W. Lundy, Barrister, Stony Plain, Alberta, the Solicitor for the Executors of the said estate on or before the 18th day of August, 1924, their names and addresses with full particulars in writing of their claims and statements of their accounts and the nature of their security (if any) held by them duly verified by statutory declaration.

AND FURTHER TAKE NOTICE that after the said 18th day of August, 1924, the executors will proceed to distribute the assets of the said deceased amongst the parties entitled thereto, having regard only to the claims of which they shall then have notice, and they will not be liable for the said assets or any part thereof so distributed to any person or persons of whose claims notice shall not have been duly received by them at the time of said distribution.

DATED at Stony Plain, this 21st day of July, 1924.

F. W. LUNDY,
Stony Plain, Alberta,
Solicitor for the Executors, Otto Oppenheimer and John Armstrong.
